POSTHOC EXISTING DATA | Repeated readout rescaling changes the body trajectory

S: uninterrupted control Qall: rescale at every switch

Leaky ReLU | ReLU | ELU | SiLU | GELU

End preactivation mean (unit median)

End preactivation SD (unit median)

End mean / SD (unit median)

End mean |activation derivative|

End open-input fraction

End accuracy deficit (fresh minus arm)

Task

Lines: mean of 10 seed summaries. Bands: between-seed SD, not confidence intervals. Task 1 is identical; interventions begin at task 2.
All 100 units included. Deficit uses the matched fresh arm; no ReLU eligibility truncation. Archived stage1_ctrl_1111 data; no new training.
