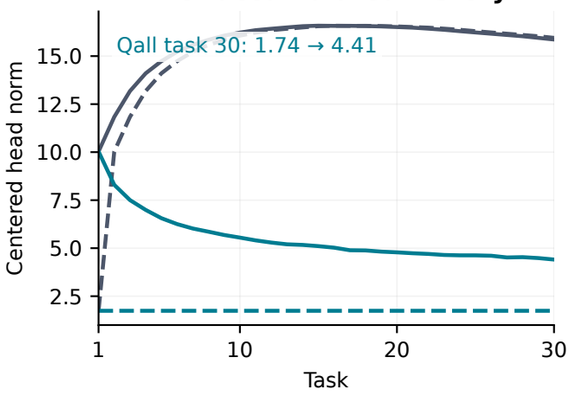
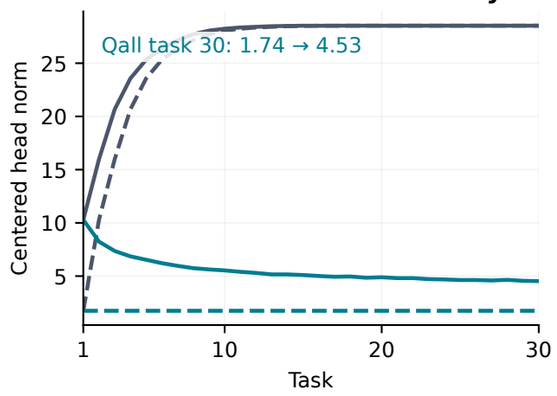
POSTHOC EXISTING DATA | Readout regrowth and single-switch versus accumulated history

S control | Qall repeated | Qbranch: one intervention from S | Head norm: start | Head norm: end

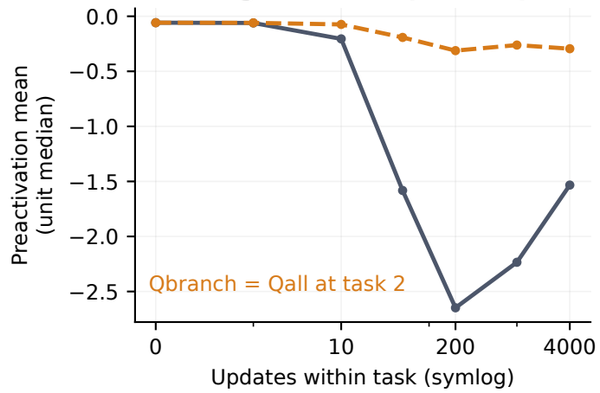
ELU: accumulated history



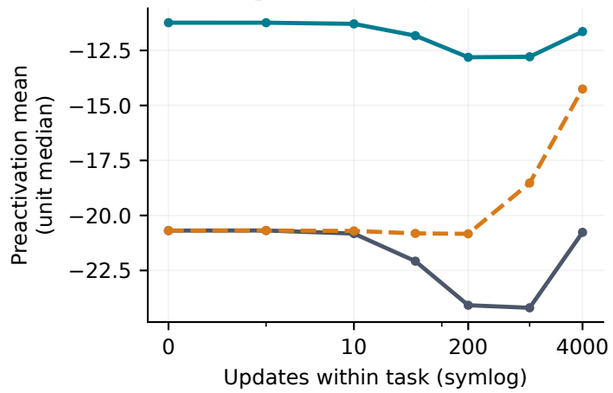
ReLU: accumulated history

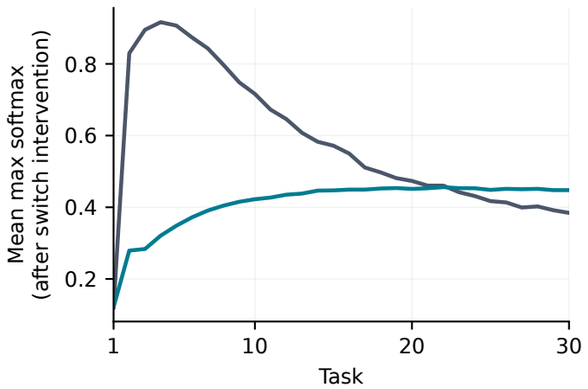


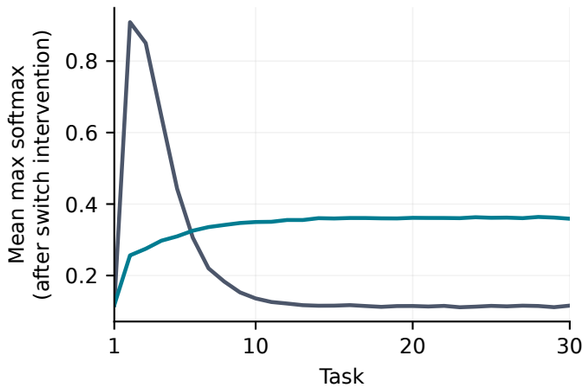
ELU task 2
Single versus repeated Q

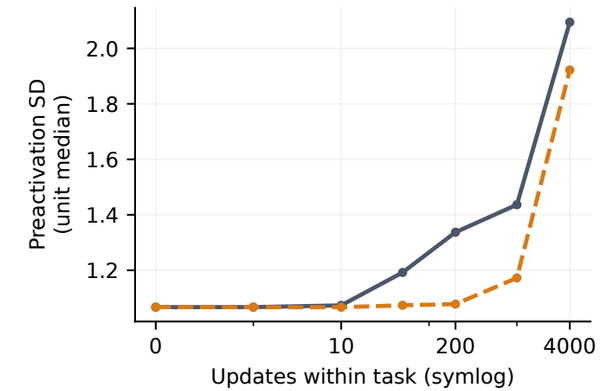


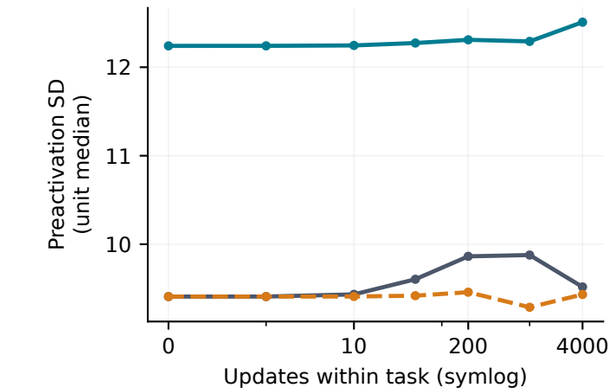
ELU task 30
Single versus repeated Q

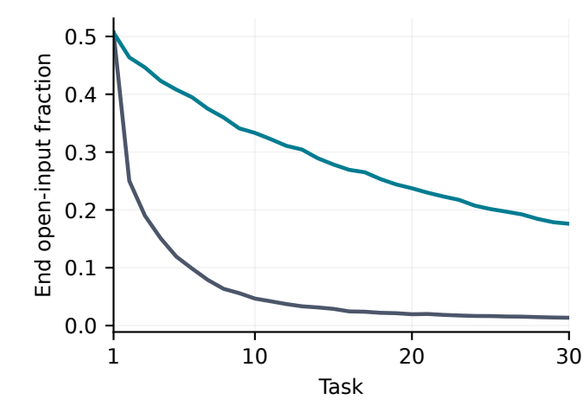


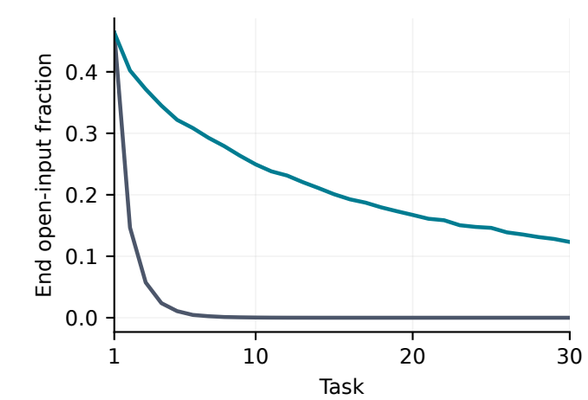


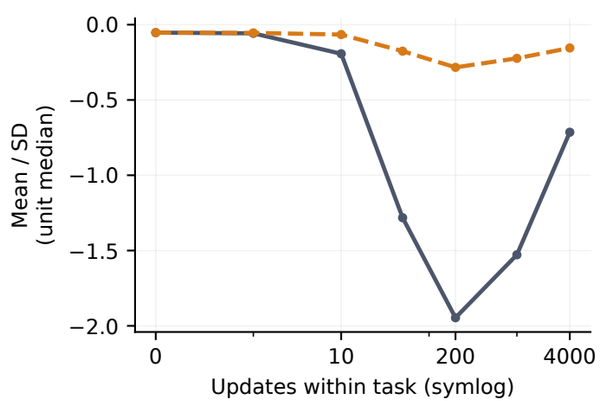


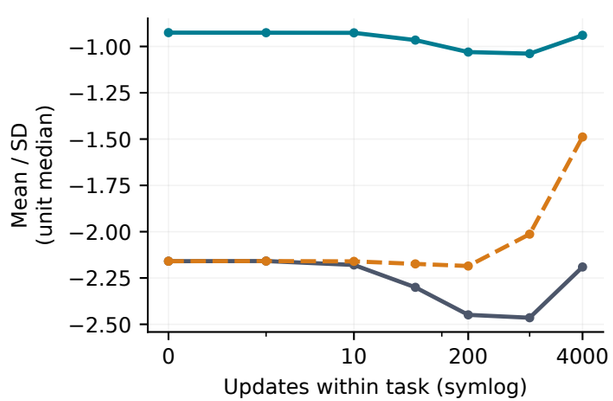












Mean of 10 seeds; all units included. Qall head norm is reset only at switches and regrows during training.
Qbranch starts from the same body as S. At task 30, Qall already has a different body at update 0. Confidence is stored only at update 0.
