Persistent non-sinking under ordinary cross-entropy and backpropagation
Loss keeps decreasing
Mean cross-entropy
Optimizer steps
Binary CE / 2 units
Softmax CE / 10 units
All units move upward
Mean preactivation
Optimizer steps
Binary CE / 2 units
Softmax CE / 10 units
Standardized position also rises
Mean / population standard deviation
Optimizer steps
Binary CE / 2 units
Proved limit: 0.250
Softmax CE / 10 units
Proved limit: 0.167
Reverse the readout: recover or shut down
Mean / population standard deviation
Optimizer steps
Correct readout
Wrong sign, magnitude 0.50
Wrong sign, magnitude 0.75
