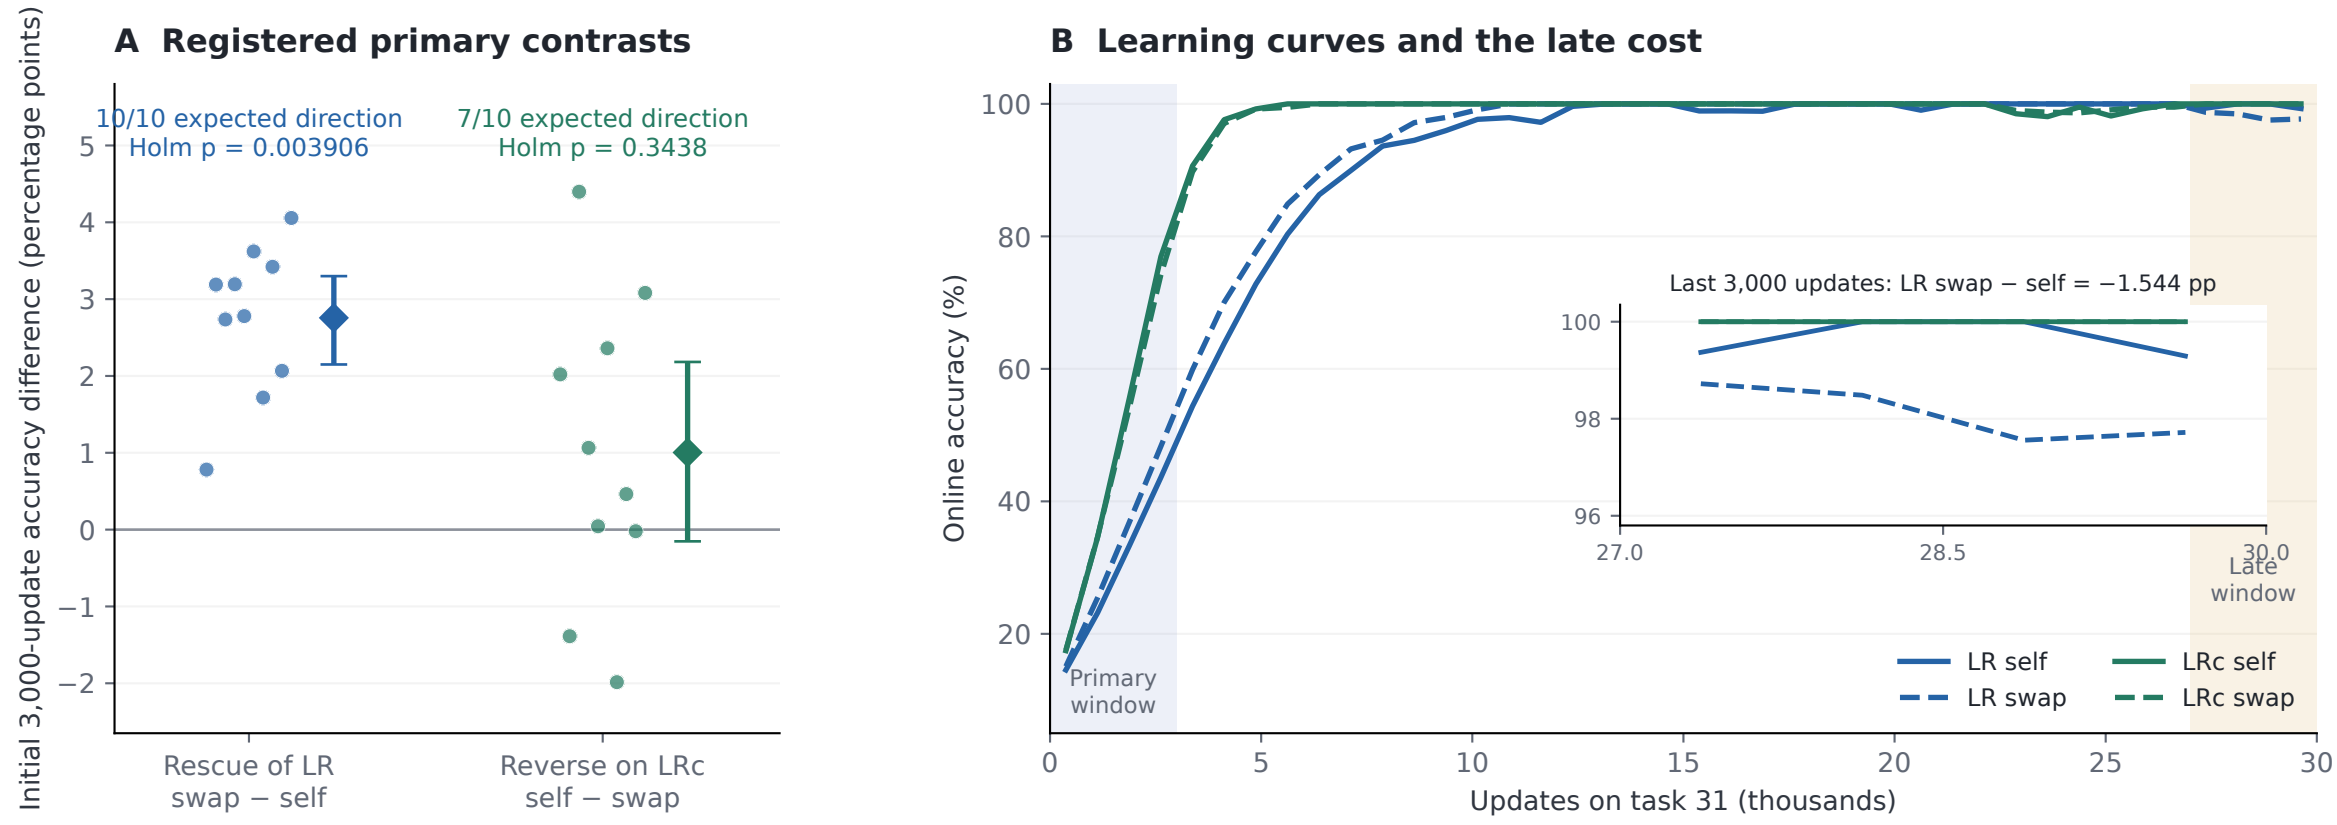
CNN response-field intervention: one direction supported

RL-CIFAR task 31 · LeakyReLU(0.1) · 10 paired seeds · c1 only · matched initial features and predictions



Dots: seeds. Diamonds: means.
Bars: seed-bootstrap 95% CI (20,000 resamples).

Curves: mean of 10 seeds in non-overlapping 750-update bins.
Late-window difference is descriptive and does not replace the primary test.
