Shared-head ViT: full-parameter SGD pressure on CLS mean / SD
Medians of 5 seeds; P1/P2 are conditional predictors, not additive components
Task 10: units pushed downward
Task 60: units pushed downward
Switch: aligned readout
Current task: update 100
Current task: update 500
Units with positive S_r (%)
P1 vs current-task gradient
P2 vs current-task gradient
Spearman correlation
FFN block (1 = nearest input)
